

UNFPA Indonesia Progress towards the Global UNFPA Three Transformative Results in 2023

Key Figures

3,4M USD ¹ Total budget	151 Knowledge Products	36 Provinces Impacted	17 Partners	10 Donors
--	----------------------------------	---------------------------------	-----------------------	---------------------

5 Outputs

Maternal Health and Midwifery	Integrated Reproductive Health	Adolescent and Youth Development	Gender Equality and Women's Empowerment	Population Dynamics and Data Analysis
-------------------------------	--------------------------------	----------------------------------	---	---------------------------------------

HIGHLIGHT PROJECTS

- Better Reproductive Health and Reproductive Rights for All in Indonesia Phase II (BERANI II) with Global Affairs Canada
- C-Surge Strengthening Maternal Health Care Systems to Accelerate Efforts in Reducing Maternal Deaths during the COVID-19 Pandemic in West Java with Australia's Department of Foreign Affairs and Trade (DFAT)
- The Global Programme on Out-of-School Adolescent Reproductive Health Education (Government of Norway)
- Technical support for the 2020-2050 population projection, analysis of 2020 long-form population survey result framework, and implementation of Indonesia One Disaster Data including in humanitarian settings.

KEY ACHIEVEMENTS

We have made strides in our journey in Indonesia towards the achievement of the three transformative results by 2030 and other key outputs in sexual and reproductive health, gender equality, humanitarian assistance, and population dynamics:

Family planning:

- Endorsement of the Public-Private Partnership Guidelines for Family Planning** with private midwife practices and hospitals under the Bangsa Kencana programme to improve access to and quality of family planning services.
- Strengthened national and subnational capacity to reduce unmet need for family planning** by supporting the establishment of a legal umbrella for the implementation of family planning supply chain management at national and provincial levels.
- Revision of the implementation of tools and guidelines** for analysis and strengthening access and quality of family planning services are available.
- Strengthened integration of family planning and HIV programmes** to prevent unwanted pregnancies and reduce HIV transmission through support for the Global Fund's principal recipient, Indonesia AIDS Coalition (IAC).
- Age Specific Fertility Rate 10-14 as a Sustainable Development Goals (SDGs) indicator** that reflects unmet need for family planning among adolescents, teenage pregnancy, and child marriage is available.

¹ The stated amount excludes USD 1,171,611 expenditures which are directly executed by UNFPA for deployment of technical experts, operational cost, and PCA (Programme Coordination and Assistance) to support activities implementation and meeting the expected outputs. The total 2023 expenditures as recorded in the UNFPA Quantum system, therefore, is USD 3,492,818 as presented in SC meeting on 23 April 2024.

Maternal health:

- The latest **Maternal Mortality Ratio (MMR) at national level and by province based** on the 2020 Long Form Population Census is available.
- **Facility-based data for annual MMR estimation is routinely gathered by health facilities** to support the Government in monitoring the achievement of maternal mortality reduction targets.
- The **model of integrated planning and budgeting for maternal mortality reduction in five districts** (Garut, Lombok Timur, Jember, Serang, and Brebes) was evaluated, and the recommendations were adopted into the district governments' 2024 planning documents.
- The **national roadmap for the acceleration of maternal mortality reduction was piloted and monitored**, including modeling of innovative model for maternal and perinatal audit, surveillance, and response (MPDSR) in six selected hospitals, socialization of the nutrition and maternal and child health (GKIA) dashboard, revision of the Basic Emergency Neonatal Obstetric Services (PONED) guidelines, and national PONED mapping analysis.
- **Increased midwives' capacities to prevent and address maternal mortality** through policy recommendations for midwifery regulation and services, and supportive supervision conducted for 10 Centers of Excellence (CoE) for Midwifery Education.

Adolescent and Youth Development

- **Expansion of the teacher's training programme** to deliver adolescent reproductive health (ARH) education at schools, reaching 208 junior high school teachers across 25 districts in 10 provinces and 68 special needs school teachers across 23 districts in 12 provinces.
- **Modules for adolescent reproductive health (ARH) education for junior high school and special needs school** renewed to support the teacher's training programme.
- **Strengthened role of integrated primary healthcare in delivering ARH education for out-of-school settings** by training 842 healthcare workers managing adolescent programmes at primary health centers from 104 districts in 32 provinces.
- The **Community of Practice (CoP) of youth SRH content creators as a national network was upscaled** to promote evidence-based, youth-friendly SRH content on social media and a model to operationalize meaningful youth participation principles.
- **Peer-to-peer approach to deliver out-of-school ARH education for young people** in Buleleng, Kupang, Ambon, Jayapura and Sorong was piloted, where trained facilitators conducted training sessions with their peers and linked them to the local community health centers based on their needs.

Population Dynamics and Data Analysis

- The **2020-2025 Population Projections and analysis of the 2020 Long Form Survey result framework and updated National Transfer Account** available and disseminated.
- The **One Disaster Data (SDBI) platform was established at national level** and replicated at the sub-national level.
- **Development and agreement** of Indonesia One International Migration Data Framework
- **Data on older persons gathered using the Golantang application disseminated** and used in the implementation of the National Strategy of Older Persons (Stranas Lansia).
- The **2020 Long Form and Short Form Population Census data disaggregated by sex, age and administrative levels** are available for GBV gap analysis.

Ending gender-based violence and harmful practices against women and girls:

- **Three draft Government Regulations are available** to support the implementation of the Sexual Violence Crime Law (UU TPKS).
- **Draft of the revised Ministry of Health's Decree and National Action Plan of Health Sector for Gender-based Violence (GBV) Prevention** is available to strengthen institutional capacity of health sector on GBV response.
- The **Roadmap and Action Plan for the integration of the gender transformative programme** into the GBV prevention and reproductive health programme is implemented in four districts.
- **Quality assurance for data set to support national monitoring dashboard** of the National Strategy of Child Marriage prevention are provided to the National Development Planning Ministry (Bappenas).
- **Strengthen advocacy to address FGM/C through health sector policies including Inclusion of female genital mutilation/cutting (FGM/C)** in the draft of Government regulation on reproductive health and pilot programme in two provinces led by the Ministry of Health in collaboration with the Indonesian Midwives Association (IBI) and Aisyiah Muhammadiyah.

HIV Prevention

- **Implementation of the Partner Notification model in 94 districts** to prevent HIV infections in District Health Offices scaled up nationwide through domestic funding.
- **Expansion of the Female Sex Workers (FSW) HIV Prevention Model in 131 districts**, which helped 70,224 female sex workers (FSW) access HIV testing and 1,242 learn their HIV status (1.8% case finding).
- **Integrated cash voucher assistance (CVA) programme targeting key populations** such as people living with HIV (PLHIV), and continues ongoing pilots targeting female sex workers using CVA to increase access to reproductive health services and HIV testing using the CVA model with Global Fund support in 6 districts.

Humanitarian Assistance

- **Strengthened disaster preparedness through capacity building** in implementing the nationally accredited minimum initial service package (MISP) and utilization of the National MISP Calculator to estimate the disaggregated numbers of vulnerable populations affected in disasters.
- **Action plan and MISP readiness capacity assessment in East Nusa Tenggara and Yogyakarta** are available as the baseline for the development of provincial contingency plans.
- **Sex, age, and disability disaggregated data (SADDD) of displaced persons in humanitarian settings was piloted** in the Cianjur disaster response and endorsed by the National Disaster Management Authority (BNPB) to ensure inclusive humanitarian assistance that leaves no one behind.

2023 ADVOCACY EVENTS

UNFPA Executive Director attended the 33rd International Confederation of Midwives (ICM) Triennial Congress
Bali, 11-14 June 2023

Introducing the new UNFPA Champion: Putu Ayu Saraswati

The Putri Indonesia Lingkungan 2020, entrepreneur, and influencer is our very first UNFPA Indonesia Champion.

- * **Launch of UNFPA and Khouw Kalbe Partnership in Empowering Girls through BESTARI Scholarship**
Jakarta, 23 February 2023
- * **BERANI Berbagi:** Dissemination of Learnings from the Better Reproductive Health and Reproductive Rights for All in Indonesia (BERANI) Programme
Jakarta, 24 March 2023
- * **Ambon Youth Concert:** Ale Rasa Beta Rasa with Jaringan Indonesia Positif, TMB Foundation, and the Government of Norway
Ambon, 28 May 2023
- * **Launch of State of World Population Report 2023** with BKKBN
Jakarta, 21 June 2023
- * **World Population Day 2023** with BKKBN
Indramayu, 20 July 2023
- * **Launch of UNFPA & Grab Public-Private Partnership** to End Gender-Based Violence
Jakarta, 25 July 2023
- * **50+ Years of UNFPA-Indonesia Partnership** for Rights & Equality with BAPPENAS
Jakarta, 30 July 2023
- * **International Youth Day 2023** with Siklus Indonesia & Community of Practice
Yogyakarta, 18 August 2023
- * Introducing our new podcast series **#BeraniBicara** (Dare to Speak)
October 2023
- * **Launch of the results of the collaborative study** by KPPPA, UNWOMEN, UNFPA, and Saraswati on the impact of **“Climate Change on Gender-based Violence in Indonesia”**, with support by the Australian Department of Foreign Affairs and Trade (DFAT)
Jakarta, 25 October 2023
- * **National-Regional Dialogue:** Youth Action to End Child Marriage and Harmful Practices
Bali, 18-19 November 2023
- * **Papua Youth Concert: Kitong Baku Jaga, Sa Jaga Ko, Ko Jaga Sa** with PKBI DKI Jakarta, TMB Foundation, and the Papua Provincial Office of Education, Library and Local Archives
Jayapura, 9 December 2023
- * **UNITE: Music Concert and Art Performance to End Violence against Women** with UN Women, UN in Indonesia, UNDP, Ministry of Women Empowerment and Child Protection (KPPPA), and Komnas Perempuan
Jakarta, 10 December 2023

Testimonies

“UNFPA's support has been instrumental in efforts to develop knowledge based on women's victim experience in various gender-based violence that is linked directly or indirectly to their sexual and reproductive health.”

Andy Yentriyani,
Chair Commissioner of the National Commission on Violence against Women
(Komnas Perempuan)

“Our cooperation with UNFPA has helped us in addressing maternal mortality, especially in strengthening emergency obstetric and newborn care services. I hope that the support will continue on.”

Laila Mahmudah,
Head of Maternal and Neonatal Working Group, Directorate of Nutrition and Maternal and Child Health, Ministry of Health

“The training was very useful for my students. Before, they had a hard time even just to identify the names of the body parts. After teaching materials about puberty, my students started to open up and care about their reproductive health.”

Nurlinawati,
Teacher at the State Special Needs School (SLB) Bina Bangsa Syamtalira Aron,
North Aceh Regency

Thank you for our shared achievements in ensuring rights and equality for women, girls, and the most vulnerable throughout 2023.
