### **Terms of Reference (TOR)**

#### **A. Background**

UNFPA Indonesia has an agreement with the Ministry of Health (MoH) to support the implementation of the HIV prevention programme for Female Sex Worker (FSW) in Indonesia funded by the Global Fund – New Funding Model Continues 2018 – 2020. The programme applied peer to peer approach, where so far, it is a pioneer within the Female Sex Workers programme. As the programme structure employs layered implementation, equal understanding on the programmatic strategy for field level implementers become critical. The strategy for programme implementation was recorded and issued in the form of printed guideline, including those specific for COVID-19 pandemic.

UNFPA and the IPs use the printed Outreach Implementation Manual and guideline series for virtual outreach during COVID-19 ([manuals can be accessed through this link](#)). The HIV team observed that the manual needs to be adjusted for online/virtual outreach activities, to provide practical guide for conducting virtual outreach, community led mapping, condom peer outlet mobile and case management.

In addition, it was also observed that it is easier for the field implementers to have the guide/references that are easy to understand, presented in more interesting and innovative ways and at the same time in a format that is easily shared.

Understanding the changing needs for more effective programme implementation, UNFPA CO is planning to recruit a Production House/Company to develop animated video graphics for Female Sex Workers programme implementation. The videos will be used for information and educational purposes for FSW programme implementors as well as general audience and are expected to covers priority topics (conducting virtual outreach, community led mapping, condom peer outlet mobile and case management) within eleven short animated videos.

### **General Principle**

The Consultancy Company will work under the co-supervision of the HIV Analyst and Communications Analyst in accordance with the UNFPA standards, rules and procedures. The consultancy company is also expected to maintain constant contact with UNFPA. The Consultancy Company should comply with the ethics and visibility rules of UNFPA, while preparing the documents, implementing the activities and particularly seeking and incorporating ideas, topics, and opinions in the process. All filmed materials, unedited footage and final production materials are the sole ownership of UNFPA. The incumbent may use any and all parts of this footage only after receiving written permission from UNFPA.

All deliverables will be produced in Bahasa and with English subtitles. The deliverable will be provided as digital forms (wmv, avi, DVD). The final version of the video should be submitted in 2 sets; a) high quality and b) compressed quality for uploading and sharing on the various internet venues.

Outputs are not considered final until explicit agreement from UNFPA has been ensured. UNFPA and programme partners reserve the rights to request edits and changes to any aspect of the production process as it sees fit. The consultancy company will be using their own equipment and materials. UNFPA will brief and guide the consultancy company about the main messages to be used in the videos in accordance with the standards, norms and procedures of UNFPA. Therefore, the consultancy company is expected to hold meetings with relevant UNFPA staffs in order to meet the expectations of the team.
